

BERGHOF PROCESS MANAGEMENT

YARD MANAGEMENT

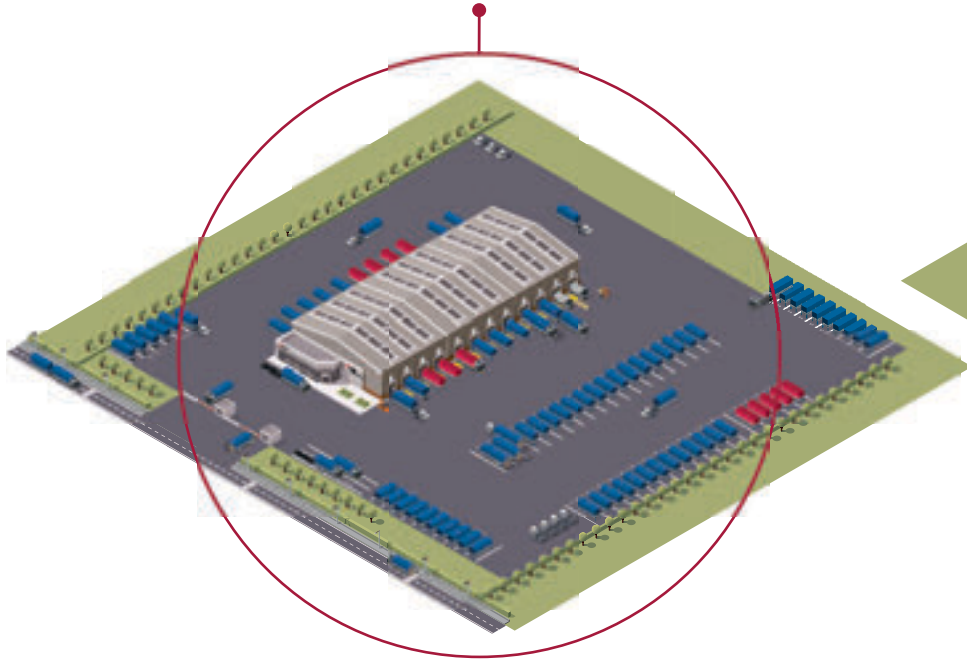

**The moment you understand
your workflow**

Organises, optimises and controls
logistics flows at your depo

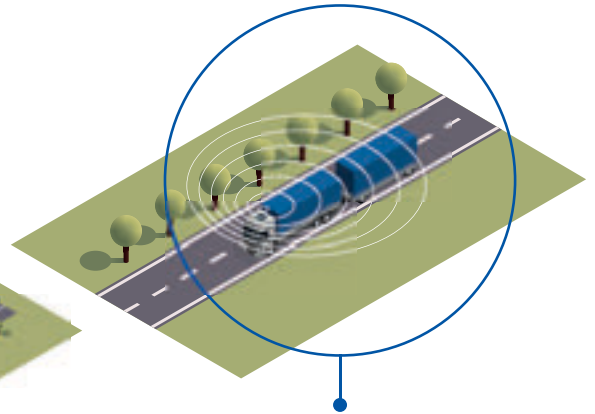

Efficient use of existing floor space through software-controlled management

YARD

ECR-Independent Service Provider
innovative-effizient-uptodate-approved

eFleetControl | eCargoControl
ECR modules always with integration of
your existing Telematics Systems -Mobile
Devices

YARD management organizes and controls all movements of loading units, so that transport routes, organisation and administration become more effective.

- Easy to implement at every operating yard
- Compatible with already existing systems
- Always having a perfect overview
- Faster turnaround times
- Shorter waiting times in the yard
- Optimized choice of swap bodies
- Suitable for large company premises with heavy delivery traffic and a large number of different loading points
