Supported platforms and devices	Berghof PLC devices of the MX6 platform
Firmware	MX6-PLC from version 1.16.0, CODESYS ab 3.5 SP10 Patch 4
Additional requirements	---
Restrictions	---

3 Product description

This software option unlocks the licence for the powertrack system software blocks for the device. The licence has to be installed on all trolley controllers within the respective plant.

Powertrack is Berghof's communication system for intralogistics. As it is adapted to communicating via contact lines, the power-track system software provides PLC blocks for Simatic S7-15xx TiA and Berghof MX6 controllers.

With these blocks, a variety of requests for the control of electric monorail conveyors or floor track systems can be covered.

The documentation for the powertrack system software blocks is created specifically for each project.
